

A photograph of a tropical poolside at dusk. A rectangular pool with glowing blue water is in the foreground. In the background, there's a thatched-roof building and a hammock under a palm tree. A semi-transparent blue rectangle on the left contains the text 'Bright ways to light up your pool'.

Bright ways to light up your pool

PAR56 STANDARD

Available in 2 versions

COLOUR LIGHTING with remote control:

To create colourful mood lighting in the water, this lamp can be lit with 11 different static colours or 5 automatic colour-change sequences. The guts pack, exclusive to BWT, provides a harmonious blend of colour.

The last program used remains in memory. A reset function is available.

WHITE LIGHTING:

Ideal for replacing 300 W incandescent lamps, it can be used to provide soft, warm lighting in pools up to 10 x 5 m.

Advantages:

- Compatible with most niches available on the market.
- Ideal for renovation projects and replacements.
- Simple, safe installation.

The PAR56 lamp is ideal for replacing 300 W incandescent lamps.

One-size fits all, it is compatible with most underwater lights available on the market and offers excellent value for money.

PAR56 ECOPROOF™

The PAR56 Ecoproof lamp can be used to replace your current LED or 300 W incandescent lamp. **Universal and 100% watertight** thanks to its rear connection chamber.

Available in 2 versions

COLOUR LIGHTING with remote control:

To create colourful mood lighting in the water, this lamp can be lit with 11 different static colours or 5 automatic colour-change sequences. The guts pack, exclusive to BWT, provides a harmonious blend of colour.

The last program used remains in memory. A reset function is available.

WHITE LIGHTING:

Ideal for replacing 300 W incandescent lamps, it can be used to provide soft, warm lighting in pools up to 10 x 5 m.

Advantages:

- Compatible with most niches available on the market.
- Suited for new builds, replacements and for renovation projects.
- Simple, safe installation.

FLAT UNDERWATER LIGHT

Compatible with all types of pools, **this light is perfect for polyester shell pools and pools fitted with a liner!** This underwater light can be screwed into a 1.5" threaded vacuum point or throughwall flange.

+
TOP TIP

Initially sold with a white face ring, the flat underwater light is now available in light blue, beige, light grey, dark grey and matt-finish metal. Match the colour of the ring to the colour scheme of the pool and delight your clients!

Advantages:

- Compatible with all types of pool in which a conventional underwater light would cause issues with leaktightness,
- Simple and safe installation thanks to the installation kit that comprises 2 heat shrink connectors.

Available in 2 versions

COLOUR LIGHTING with remote control:

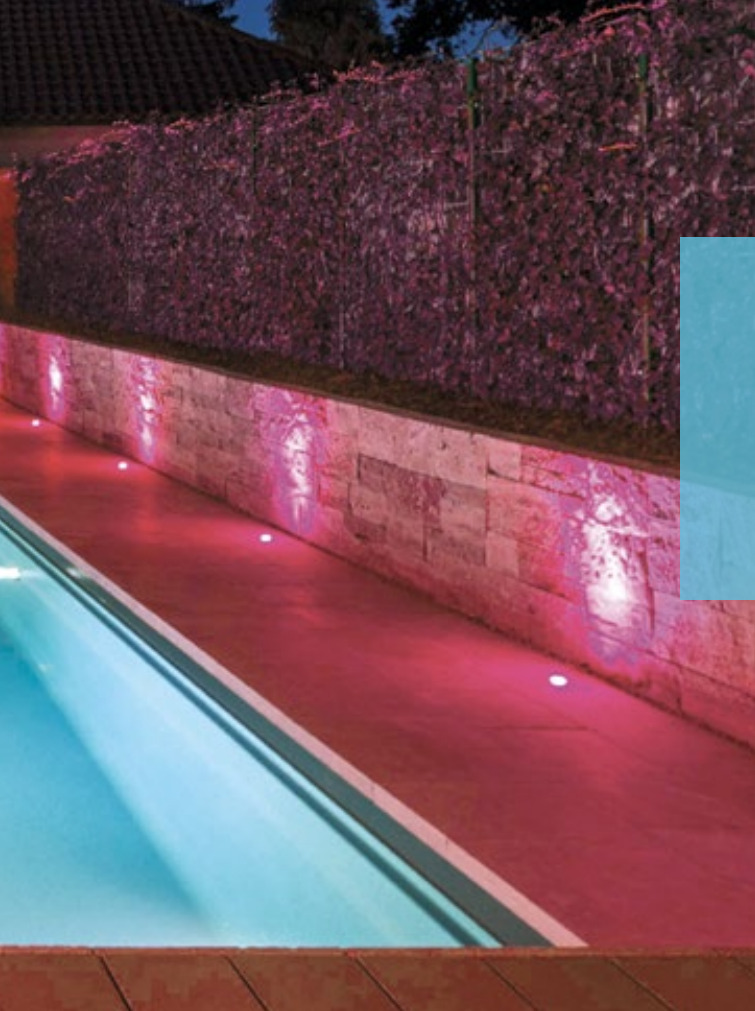

To create colourful mood lighting in the water, this lamp can be lit with 11 different static colours or 5 automatic colour-change sequences. The guts pack, exclusive to BWT, provides a harmonious blend of colour.

The last program used remains in memory. A reset function is available.

WHITE LIGHTING:

Ideal for replacing 300 W incandescent lamps, it can be used to provide soft, warm lighting in pools up to 10 x 5 m..

MINI UNDER-WATER LIGHT

Light up your spa, the steps of your pool or your submerged deck! Designed for installation in new builds, the BWT mini underwater light illuminates specific areas of your pool. Can be screwed into 1.5" threaded throughwall flange or vacuum point.

Available in 2 versions

COLOUR LIGHTING on/off:

To create colourful mood lighting in the water, this lamp can be lit with 11 different static colours or 5 automatic colour-change sequences. The guts pack, exclusive to BWT, provides a harmonious blend of colour.

The last program used remains in memory. A reset function is available

WHITE LIGHTING:

Ideal for new builds, this underwater light can provide gentle, harmonious illumination of zones as large as 5 metres in the pool.

The light is switched on and off by cutting and re-establishing the current in the pool's electrical panel.

TOP TIP

The back of the support features 1.5" male threading, so the BWT mini-underwater light is easy to install without any special tools.

Advantage:

- Compatible with all types of pools

TUBULAR UNDERWATER LIGHT

TOP TIP +

Once screwed into the vacuum point, this underwater light disappears into the throughwall flange!
Perfectly discreet!

Create colourful mood lighting in your spa, or around the steps or submerged decks in your pool!

Designed to be installed in new builds, the BWT tubular underwater light can be used to light up specific areas of the pool. This underwater light is screwed into a 1.5" threaded vacuum point or throughwall flange.

Available in 2 versions

COLOUR LIGHTING with remote control:

To create colourful mood lighting in the water, this lamp can be lit with 11 different static colours or 5 automatic colour-change sequences. The guts pack, exclusive to BWT, provides a harmonious blend of colour.

The last program used remains in memory. A reset function is available.

WHITE LIGHTING:

Ideal for new builds, this underwater light can be used to provide soft, harmonious illumination in pools up to 5 x 3 m.

Advantages:

- Compatible with all types of pools where installation of a conventional underwater light could cause issues with watertightness.

RADIO CONTROL MODULE

Stress-free operation of your installation! Available in 1 and 4 channel versions, the BWT remote switch module can be used to control several underwater lights without modifying the electrical installation.

+
TOP TIP

Fitted with connectors for cables with a cross section up to 6 mm², the remote control module can be installed without any specific work on the underwater light's very low voltage electrical supply.

Advantages :

- Excellent performance
- Easy installation
- Hard wearing
