

The background image shows a modern swimming pool with a BWT Thermodeck cover. The pool is surrounded by a wooden deck and a modern house with large glass windows. The sky is blue with some clouds. A semi-transparent blue box is overlaid on the left side of the image, containing the text.

Thermodeck protects beautiful pools!

FOR EXISTING POOLS AND POOLS UNDER CONSTRUCTION

THERMODECK, *the best protection available*

SAFETY GUARANTEED

A Thermodeck cover, like every BWT cover, is the best available means of preventing accidental falls into a pool.

Thermodeck complies with every stipulation of the French standard NF P 90-308 and allows you to enjoy your pool with complete peace of mind.

With a simple twist of a key and in just a few seconds, your cover closes effortlessly over your pool. Your pool is secured. Your peace of mind guaranteed.

PURE WATER

Thermodeck covers have an opacity coefficient that inhibits photosynthesis and hence the growth of algae. Your pool water is cleaner thus economising filtration time and water treatment products.

TEMPERATE WATER

Thermodeck shelters your pool against cool nights and cold gusting winds. You can begin your pool season in early spring and extend it into late Indian summers

BEAUTIFUL

Thermodeck combines effective and reliable protection with an undeniable visual appeal. Each cover is designed to harmoniously follow the pool contour and the wide choice of slat colours allows you to add an additional touch of refinement.

Thermodeck, the best, and most beautiful, protection available.

A SIMPLE, CLEVERLY DESIGNED SYSTEM

Thermodeck is a BWT cover, designed and manufactured by a market leader.

WITH BWT,
you can relax!

AN EXCLUSIVE ANTI-TILT MECHANISM

Like all BWT covers, Thermodeck is fitted with an anti deflection system that blocks the slats, preventing them from tilting more than 15° towards the bottom. This is the smallest angle of deflection achieved by any slat cover available on the market. This increases the load bearing capacity of the cover and so, offers better protection to you.

An exclusive, patented anti-tilt mechanism to achieve the smallest angle of deflection of any slat cover on the market.

AN ECOCITIZEN APPROACH

By keeping your pool clean and reducing filtration time, Thermodeck saves on energy and on pool chemicals.

Because Thermodeck reduces the quantity of pool chemicals necessary, it lessens your pool's ecological impact on the environment.

Lastly, as part of its overall environmental design, the PVC that makes up your cover can be recycled. With Thermodeck, you get cutting edge technology and reduce your environmental foot print.

A sober, classic design

With its elegantly simple, square cross section housing, made of extremely strong Moabi wood, pine or UV stable PVC, Thermodeck embellishes any pool setting.

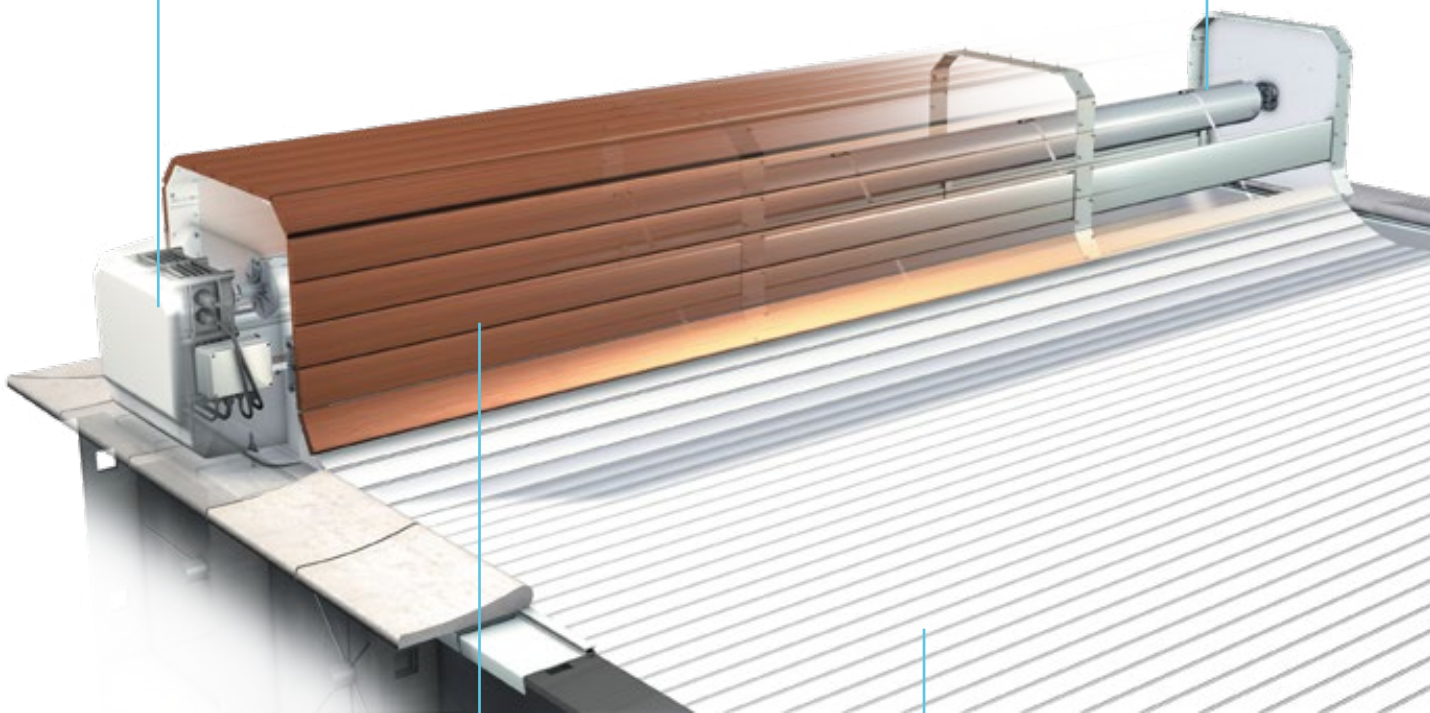

- Lateral protective casings on the motor side and the bearing side.
- Works off a 230V mains supply.
- Rolls up in just two minutes; pool 10 x 5 m.

MOTOR

The Aquamat motor is protected against intermittent splashing, ends of travels are programmed electronically.

AXLE

made of anodised aluminium with a reinforced internal structure

COVER HOUSING

5 cover housing models (small or large) :
exotic wood, solid pine, white, beige or grey.

SLAT APRON

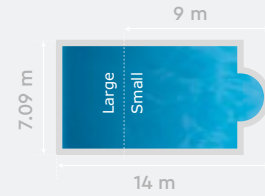

Available in 5 colours:

2 VERSIONS AVAILABLE

- **Large**
Maximum dimensions
(Steps included)
7.09m x 14m
- **Small**
Maximum dimensions
(Steps included)
7.09m x 9m

EASY UPKEEP

BWT covers require very little cleaning; they are designed to stay clean. When it comes to winterizing, BWT makes your life even easier, the motor block is very light and can be easily removed by hand in just a few seconds without any tools.

Summer and winter, BWT offers the best protection.

REDUCES EVAPORATION FROM INDOOR POOLS

On indoor pools, the cover slats form an effective barrier that prevents evaporation and subsequent condensation on walls and windows. This barrier also significantly reduces heat loss and generates cost savings.

UNRIVALLED KNOW-HOW

With the BWT range, PROCOPI offers you years of experience along with ultra-modern manufacturing tools that, together, ensure perfectly repeatable, strictly controlled, top quality production methods.

LEGAL INFORMATION

All BWT covers comply with the French standard NF P 90-308 (May 2004 version concerning pool protection) if all items comprising the cover are supplied by Procopi.

Pool safety cover intended to deny children under five access to the pool. This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and/or responsible adults that remains the key factor in ensuring the safety of young children.

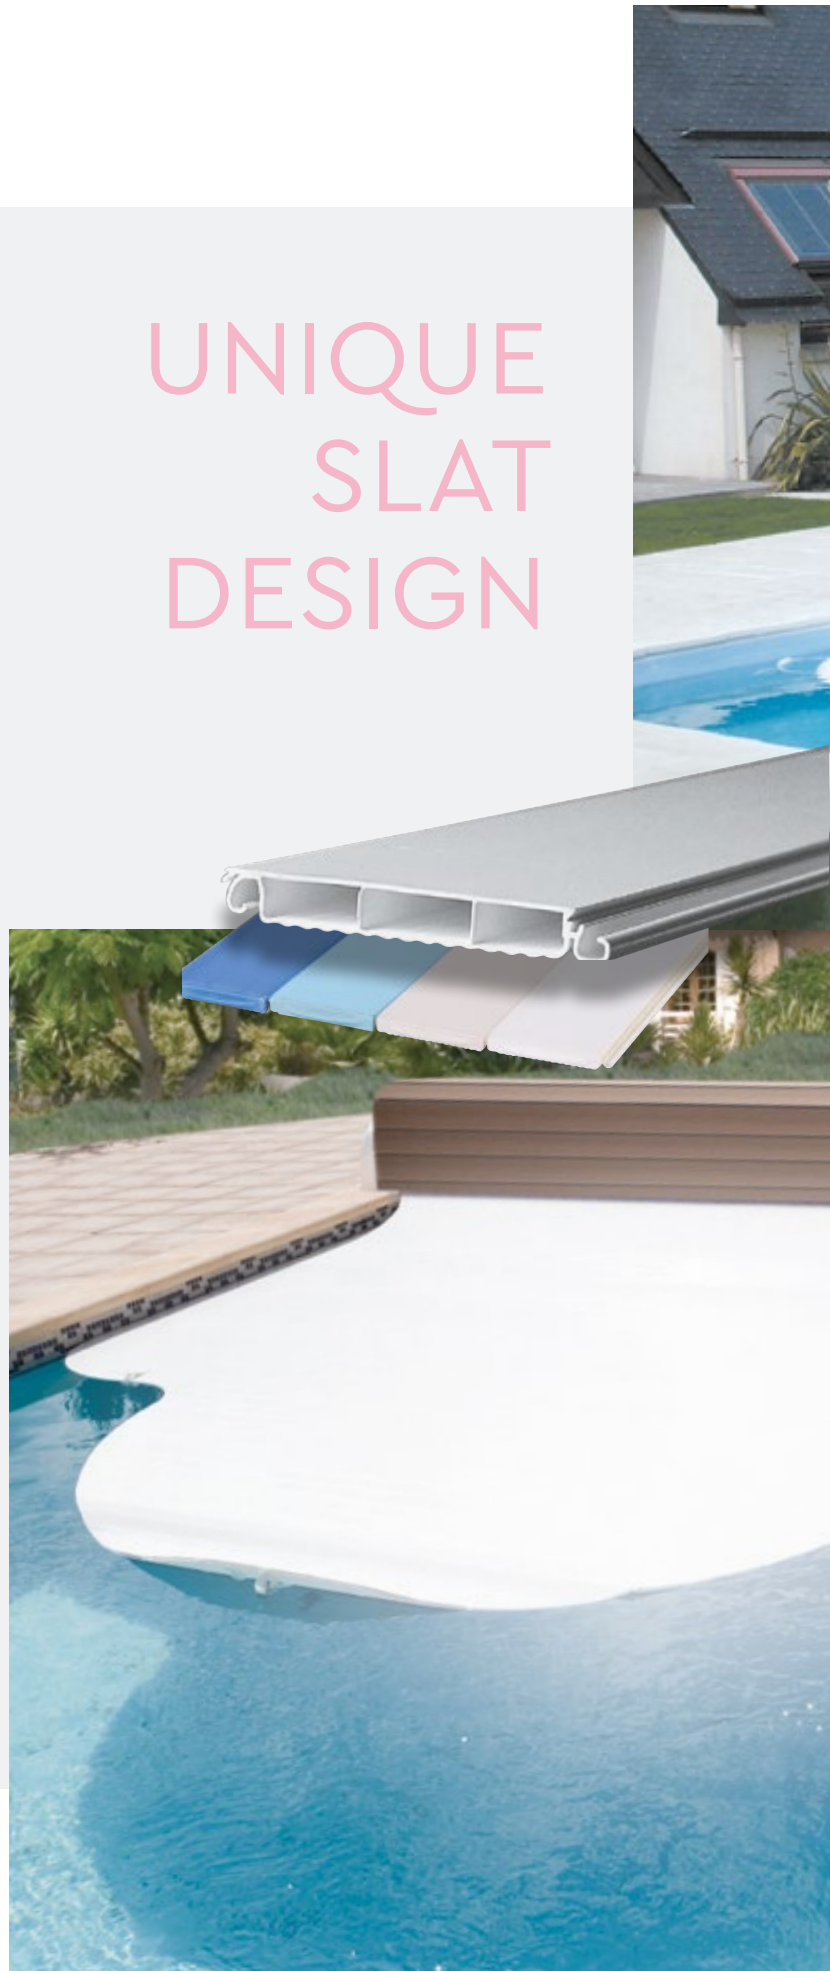

UNIQUE SLAT DESIGN

- Ultrasonically welded end plugs: watertightness guaranteed
- Beautiful, down to the finest detail: end plug colours match the slat colours.
- Thermodeck covers are made of high quality PVC that confers excellent strength, despite the thin air cell walls.

Some of the most important advantages offered by Thermodeck covers are a result of this unique slat design; a large volume of air trapped inside the minimum amount of plastic.

The benefit is three-fold:

- Firstly, the air volume/slat thickness ratio ensures excellent cover buoyancy compared to other covers with thicker slats, this increased buoyancy limits the displacement and evacuation of water when the cover is deployed.
- Furthermore, the slats are absolutely leaktight, water cannot enter the air cells. The air trapped inside is thus static and dry, guaranteeing optimum thermal insulation.
- Lastly, because the slat cover is extremely buoyant, it has an excellent load bearing capacity and can easily support the weight of a grown man.

COLOURS

Thermodeck offers a choice of five slat covers. Choose yours.

LOCK SAFETY FASTENERS

A wide selection of colours for your Lock safety fasteners.

STEPS

BWT covers can be made to fit straight steps, roman steps, even free-form steps. Two type of finish are available, stepped or smooth.

Stepped finish

Smooth finish
